

**PATENT**

Serial No.: 10/034,090

Docket No. 30564.2

Customer No. 000027683

**Listing of Claims**

The following listing of claims will replace all prior versions, and listings, of claims in the application.

1. (Currently amended) A system, comprising:  
a computer system for:  
through a network, providing a plurality of templates ~~a template~~ to a user;  
through the network, receiving a selection from the user of ~~the~~ at least first and second templates of the plurality of templates ~~template~~; and  
generating a database including information of the selected first and second templates ~~template~~ selected by the user.
2. (Currently amended) The system of claim 1 wherein the first template includes a predefined table.
3. (Currently amended) The system of claim 1 wherein the first template includes a predefined form.
4. (Currently amended) The system of claim 1 wherein the first template includes a predefined field.
5. (Currently amended) The system of claim 1 wherein the first template includes a predefined section.
6. (Previously presented) The system of claim 5 wherein the predefined section includes a predefined field.

PATENT  
Serial No.: 10/034,090  
Docket No. 30564.2  
Customer No. 000027683

7. (Currently amended) The system of claim 1 wherein the selection is a first selection, and the computer system is for:

in response to receiving a second selection from the user, associating the first template with a program associated with an agency.

8. (Previously presented) The system of claim 1 wherein the computer system is for:

in response to receiving information associated with a form created by the user, generating the database including the form.

9. (Previously presented) The system of claim 8 wherein the information associated with the form includes a field selected by the user.

10. (Previously presented) The system of claim 9 wherein the information associated with the form includes an attribute associated with the field, and wherein the attribute is changeable by the user.

11. (Cancelled)

12. (Currently amended) The system of claim 1 wherein the computer system is for:

receiving login information from the user; and

authenticating the user using the login information prior to providing the first and second templates ~~template~~ to the user.

Customer No. 000027683

13. (Currently amended) A method, comprising:  
through a network, providing a plurality of templates ~~a template~~ to a user;  
through the network, receiving a selection from the user of ~~the~~ at least first and  
second templates of the plurality of templates ~~template~~; and  
generating a database including information of the selected first and second templates  
template.

14. (Currently amended) The method of claim 13 wherein the first template  
includes further comprising:  
~~through the network, providing the template to the user, the template including a~~  
predefined table.

15. (Currently amended) The method of claim 13 wherein the first template  
includes further comprising:  
~~through the network, providing the template to the user, the template including a~~  
predefined form.

16. (Currently amended) The method of claim 13 wherein the first template  
includes further comprising:  
~~through the network, providing the template to the user, the template including a~~  
predefined field.

17. (Currently amended) The method of claim 13 wherein the first template  
includes further comprising:  
~~through the network, providing the template to the user, the template including a~~  
predefined section.

18. (Currently amended) The method of claim 17 wherein further comprising:  
~~through the network, providing the template to the user, the template including the~~  
~~predefined section, and the predefined section includes including a predefined field.~~

PATENT  
Serial No.: 10/034,090  
Docket No. 30564.2  
Customer No. 000027683

19. (Currently amended) The method of claim 13 wherein the selection is a first selection and further comprising:

in response to receiving a second selection from the user, associating the first template with a program associated with an agency.

20. (Currently amended) The method of claim 13 and further comprising:  
in response to receiving information associated with a form created by the user,  
generating the database including the form.

21. (Previously presented) The method of claim 20 wherein the information associated with the form includes a field selected by the user.

22. (Previously presented) The method of claim 21 wherein the information associated with the form includes an attribute associated with the field, and wherein the attribute is changeable by the user.

23. (Cancelled)

24. (Currently amended) The method of claim 13 further comprising:  
receiving login information from the user; and  
authenticating the user using the login information prior to providing the first and second templates ~~template~~ to the user.

## PATENT

Serial No.: 10/034,090

Docket No. 30564.2

Customer No. 000027683

25. (Currently amended) A computer program product, comprising:  
a computer program processable by a computer system for causing the computer system to:

- through a network, provide a plurality of templates ~~a template~~ to a user;
- through the network, receive a selection from the user of ~~the~~ at least first and second templates of the plurality of templates ~~template~~; and
- generate a database including information of the selected first and second templates ~~template~~; and

an apparatus from which the computer program is accessible by the computer system.

26. (Currently amended) The computer program product of claim 25 wherein the first template includes ~~the computer program is processable by the computer system for causing the computer system to:~~

- ~~through the network, provide the template to the user, the template including a~~ predefined table.

27. (Currently amended) The computer program product of claim 25 wherein the first template includes ~~the computer program is processable by the computer system for causing the computer system to:~~

- ~~through the network, provide the template to the user, the template including a~~ predefined form.

28. (Currently amended) The computer program product of claim 25 wherein the first template includes ~~the computer program is processable by the computer system for causing the computer system to:~~

- ~~through the network, provide the template to the user, the template including a~~ predefined field.

## PATENT

Serial No.: 10/034,090

Docket No. 30564.2

Customer No. 000027683

29. (Currently amended) The computer program product of claim 25 wherein the first template includes the computer program is processable by the computer system for causing the computer system to:

~~through the network, provide the template to the user, the template including a~~  
predefined section.

30. (Currently amended) The computer program product of claim 29 wherein ~~the computer program is processable by the computer system for causing the computer system to:~~

~~through the network, provide the template to the user, the template including the~~  
predefined section includes, ~~and the predefined section including a predefined field.~~

31. (Currently amended) The computer program product of claim 25 wherein the selection is a first selection, and the computer program is processable by the computer system for causing the computer system to:

in response to receiving a second selection from the user, associate the first template with a program associated with an agency.

32. (Previously presented) The computer program product of claim 25 wherein the computer program is processable by the computer system for causing the computer system to:

in response to receiving information associated with a form created by the user, generate the database including the form.

33. (Previously presented) The computer program product of claim 32 wherein the information associated with the form includes a field selected by the user.

34. (Previously presented) The computer program product of claim 33 wherein the information associated with the form includes an attribute associated with the field, and wherein the attribute is changeable by the user.

Docket No. 30564.2

Customer No. 000027683

35. (Cancelled)

36. (Currently amended) The computer program product of claim 25 wherein the computer program is processable by the computer system for causing the computer system to:

receive login information from the user; and

authenticate the user using the login information prior to providing the first and second templates ~~template~~ to the user.

37. (New) The system of claim 1 wherein the first template includes the second template and other information.

38. (New) The system of claim 37 wherein the other information is a third template.

39. (New) The system of claim 1 wherein the selection from the user is a first selection and the computer system is for:

in response to a second selection from the user, modifying the first template.

40. (New) The system of claim 1 wherein the selection from the user is a first selection and the computer system is for:

in response to a second selection from the user, modifying the second template.

41. (New) The system of claim 1 wherein the selection from the user is a first selection and the computer system is for:

in response to a second selection from the user, modifying the first and second templates.

PATENT  
Serial No.: 10/034,090  
Docket No. 30564.2  
Customer No. 000027683

42. (New) The system of claim 41 wherein the first template includes the second template and other information.

43. (New) The system of claim 42 wherein the other information is a third template.

44. (New) The method of claim 13 wherein the first template includes the second template and other information.

45. (New) The method of claim 44 wherein the other information is a third template.

46. (New) The method of claim 13 wherein the selection from the user is a first selection and comprising:  
in response to a second selection from the user, modifying the first template.

47. (New) The method of claim 13 wherein the selection from the user is a first selection and comprising:  
in response to a second selection from the user, modifying the second template.

48. (New) The method of claim 13 wherein the selection from the user is a first selection and comprising:  
in response to a second selection from the user, modifying the first and second templates.

49. (New) The method of claim 48 wherein the first template includes the second template and other information.

50. (New) The method of claim 49 wherein the other information is a third template.

PATENT  
Serial No.: 10/034,090  
Docket No. 30564.2  
Customer No. 000027683

51. (New) The computer program product of claim 25 wherein the first template includes the second template and other information.

52. (New) The computer program product of claim 51 wherein the other information is a third template.

53. (New) The computer program product of claim 25 wherein the selection from the user is a first selection and the computer program is processable by the computer system for causing the computer system to:  
in response to a second selection from the user, modify the first template.

54. (New) The computer program product of claim 25 wherein the selection from the user is a first selection and the computer program is processable by the computer system for causing the computer system to:  
in response to a second selection from the user, modify the second template.

55. (New) The computer program product of claim 25 wherein the selection from the user is a first selection and the computer program is processable by the computer system for causing the computer system to:  
in response to a second selection from the user, modify the first and second templates.

56. (New) The computer program product of claim 55 wherein the first template includes the second template and other information.

57. (New) The computer program product of claim 56 wherein the other information is a third template.
